| Main category:        | rear warning marking kits |
| Model:                | Kodiaq                    |

## Description

**Original design30710 rear warning marking set in accordance with DIN 30710 for the rear area in red/white, for self-assembly.**

Ready-fitted, tension-free elements for easier self-assembly in design112 quality with rounded corners and no sharp edges on the surfaces, for minimal contact area and maximum service life.

## Design/foil

**Red/white:** *design30710 warning marking red/white* - Oralite 5921 M - Microprismatic warning marking red/white in accordance with DIN 30710 for fixed structures

## Information on fit

For technical reasons, there are slight differences in fit at the transitions of the warning bars over vehicle edges and beads. This is hardly noticeable at a normal viewing distance of 5 m or more, therefore does not impair the warning effect and does not constitute grounds for complaint. The starting point of the strip pattern may differ slightly from the illustrations. However, this has no relevance for approval and/or safety.

We expressly reserve the right to make changes in the interest of technical progress, which may be made without prior notice.
