Description

Original design112 lettering set for BF4 heavy goods transport escort vehicles

The high-quality lettering set from design112 is the professional solution for the standard-compliant marking of BF4 escort vehicles. All lettering and marking elements are prefabricated to fit perfectly and can be easily and neatly installed without special tools. The complete set meets all requirements in accordance with Traffic Gazette B3422 – as of 2015 and ensures maximum visibility and safety in road traffic.

Scope of delivery (as shown):

BF4 warning marking set red/white in 180 mm grid for front, sides and rear

Surface film in white

Retroreflective lettering blocks "Schwertransport" (heavy transport) in accordance with ECE104

Circumferential contour marking in red (rear) and white (sides) in accordance with ECE104

All elements are machine-precision manufactured and tailored to the vehicle. Delivery includes installation instructions so that application can be carried out quickly and easily.

Advantages at a glance:

Complete set in accordance with Traffic Bulletin B3422 (as of 2015)

Highly reflective materials in accordance with ECE104

Precise fit and easy to install

Maximum safety and professional appearance

Ideal for operators of heavy transport escort vehicles who value quality, safety and vehicle marking in accordance with regulations.
