Aluminium warning signs

Aluminium warning signs in accordance with DIN 30710, 705 x 141 mm

Characteristics

Description

Aluminium warning signs in a set, pointing right and left

Warning sign in accordance with DIN 30710, microprismatic, laminated onto an aluminium plate for easy attachment to non-adhesive surfaces.

Compared to standard warning markings, the use of microprismatic marking material of reflectivity class C in accordance with ECE104 achieves a higher warning effect even at a greater distance.

Application package Warning sign in accordance with DIN 30710, 705 x 141 mm

Film: Oralite 5921M – Warning sign for fixed structures, red/white in accordance with DIN 30710

Substrate: Aluminium 0.8 mm

Format: 705 x 141 mm

Scope of delivery: Application package, one sign pointing to the right and one pointing to the left
