Model: Tayron

## Description

### Contour marking VW T5 vehicle sides - 17 pieces

Ready customized, stress-free elements for easy self-installation in design112 quality with rounded corners and no hems, for minimal attack surface and maximum service life.

Our contour marking sets are tailored to the particular type of vehicle and the contours and beads of the corresponding vehicle are adapted. The individual, stress-free elements fit exactly to the corresponding part of the vehicle, this eliminates a troublesome recutting or even cutting in the paint and this provides easy self installation.

Due to the prefabrication of the elements is a simple, **quick and precise installation** easy. Normally, a skilled artisan layman needs **less than 45 minutes** to provide a complete vehicle with one of our marker sets. In contrast, the application of conventional rolls would take 4-5 hours to complete. The enormous time savings and the significant gain in quality of our finished sets speak for themselves.

**Type:** VW T5, rear door

**Scope:** 17 pieces

Select your desired color / design:
